Education

St. Joseph's College (Autonomous)

Master of Science in Artificial Intelligence | CGPA: 8.89/10 (Current)

Bachelor of Science in Computer Science | CGPA: 8.38/10

Tiruchirappalli, Tamil Nadu

July 2025 - May 2027

July 2022 - May 2025

Experience

AI/ML Engineer Intern

VDart Academy

May 2026 - Jun 2026

Tiruchirappalli, Tamil Nadu

- Designed and built a production-ready **Educational AutoML platform** automating **EDA**, **data preprocessing**, **model training**, evaluation, and comparison for supervised learning tasks (classification/regression) using **Scikit-learn** and **XGBoost** with **PostgreSQL** based experiment tracking.
- Engineered backend **REST APIs** using **FastAPI**, **SQLAlchemy**, and **Pydantic** for dataset management, automated ML pipelines and statistical data quality analysis. Implemented **async database operations** and request validation.
- Containerized and deployed the application using **Docker**, **Render**, **Vercel**, and **PostgreSQL** configuring the production database and **CI/CD pipeline integration** for the company's live ML system.

Projects

AION 2K26 - State Level Technical Symposium Website | [GitHub](#) | [Live](#)

- Built and deployed a **full stack symposium registration platform** using Node.js/Express and MongoDB handled **real-time user load** and complex scheduling logic.
- Engineered **multi-role registration** workflow with **slot based scheduling**, conflict detection and team coordination features. Implemented **input validation**, **error handling**.
- Led complete **deployment**: Frontend on **Vercel** with **custom domain**, Backend on **Render**, **MongoDB Atlas** for data persistence. configured DNS, managed **CI/CD integration**.

Skills

Languages: Python, Java, JavaScript.

Machine Learning: Scikit-learn, XGBoost, Pandas, NumPy, EDA, Classification, Regression, Model Evaluation.

Backend & APIs: FastAPI, REST APIs, SQLAlchemy, Pydantic.

Frontend: HTML, CSS, Tailwind CSS.

DataBases: PostgreSQL, MySQL, MongoDB.

DevOps & Deployment: Docker, Render, Vercel, Git/GitHub, MongoDB Atlas.

Technical Foundations: Data Structures and Algorithms, Database Management System, Operating System, Computer Networks.

Awards and Achievements

- Solved **300+ problems** & **1370+ Contest rating** on **LeetCode** and earned the LeetCode **365 days consistency badge** through long-term DSA practice, and actively participated in **weekly contests**.
- Awarded **Outstanding Performer** with Batch Endowment Cash Prize for **top academic distinction** across 5 semesters of B.Sc Computer Science (College Day 2025).
- Achieved victories in **12 technical events** at **intercollegiate symposiums**, demonstrating strong proficiency in code debugging, data structures and algorithms, and paper presentation.
